## The Contras

Once upon a time, Sundog Systems announced a new 512k game called *The Contras*. It took two years and three programmers to complete this, the most ambitious game ever created for the CoCo 3. Jeff Steidl, accomplished author of *Photon* and *GrafExpress 2.0*, led the effort to produce this technological marvel. In doing so, he proved that the CoCo can match or surpass any home game system.

*The Contras* features a two player cooperative mode, 512k filled with incredible graphics, super smooth animation and scrolling, an outstanding background music score, sizzling sound effects, and lightning fast arcade action.

This is paramilitary combat at its best. Play alone or with a friend as you take on the evil alien invaders. Blow away the enemy while travelling thru multiple levels and powering up with ever more destructive weapons. *The Contras* will keep you playing for hours; it is quite possibly the best CoCo game ever! Requires 512k CoCo 3, disk drive & joystick. Shipping November 10! Order now for fastest delivery!

# And here are a few of the new goodies for RSDOS!

**Special bonus thru 12/15: Buy any 3 programs from these two pages, and take 20% off!**

## HRS-DOS

This new enhancement, primarily designed for users of RGBDOS and Ken-Ton hard drive systems, allows easy transfer and handling of RSDOS files while running OS9! With *HRS-DOS*, you can check directories of any RSDOS drive on your hard drive system while running OS9, copy in RSDOS files, copy OS9 files to your RSDOS section, and much more! *HRS-DOS* requires no patching of C3Disk or any other module! For this reason, many users without Ken-Ton hard drives (or any hard drive, for that matter) may well find *HRS-DOS* indispensable for reading in RSDOS floppies! Requires C3, OS-9 lv 2.

**\$19.95**

## SMARTWATCH DRIVERS

Now, you can make use of the easily installed Smartwatch realtime clock under RSDOS, and can even use it with the popular shareware terminal program *Ultimaterm*! This software package includes util's for setting and reading the time from RSDOS, and also includes a special *WIFCLOCK.BIN* module. If you don't already have a Smartwatch, we also offer a special package including the chip and drivers. The Smartwatch is easily installed in any disk controller with a 28-pin ROM socket (such as the Tandy FD-502, any Distro model, and many HDS and J&M controllers). Price for chip and drivers is only \$39.95, or purchase the software alone for only

**\$14.95**

## CC3FAX

Now, you can use your CoCo 3 in conjunction with a shortwave radio receiver to receive, view and print FAX transmissions from news services, amateur radio operators...even weather charts and reports from the U.S. Navy! This is the most complete FAX package ever released for the CoCo! Requires 512k CoCo-3, and a shortwave receiver capable of SSB (single sideband), or CW (morse code) reception.

**\$29.95**

## EDT/ASM 6309

EDT/ASM 6309 v.3DG.00 for the Coco is now shipping! This is a major patch to Tandy's Disk EDT/ASM (Editor/Assembler) and offers many improvements over the original version, including support for both the standard 68B09E and the popular new 68309. The program disk includes separate versions for Coco 1/2 and the Coco 3. The only major noticeable difference is that the Coco 3 version uses an 800K boot sector and has a larger file (2Mbytes).

### CHANGES TO EDTASM

- Editor size increased to over 40K bytes
- Directory obtainable from both Editor and ZBUG
- Multiple ICB and FDB data per line
- FCB supported
- ZBUG now defaults to numeric instead of symbolic mode
- RGBDOS users now have support for drive numbers higher than 3
- 6309 opcodes now supported for both assembly & disassembly
- HD6309 detection is included and if present incorporates a ZBUG error trap for illegal opcodes and enables monitoring and changing the I,F,V register from ZBUG
- CC 3 users can now safely exit to Basic and use the RESET but on from within EDT/ASM

### REQUIREMENTS

You must already own Tandy's EDT/ASM to make use of this enhanced version. There is a PATCHER program on the product disk which will automatically convert your program for use. Selection of Coco 1&2 vs. Coco3 version is automatic. Coco 1&2 versions do require 64K RAM. The Coco 3 version will work with 128K of RAM.

### NEW COMMANDS

- V - obtains a directory from either Editor or ZBUG modes.
- FCS - is used exactly like FCC but automatically add \$80 to the last character in the string.
- ICB, FDB - for multiple entries per line entries should be separated by a comma.

### SUPPORT FOR 6309 OPCODES

The product disk contains several text files describing the 6309 and the new opcodes. These can be accessed with any word processing program or may be printed by a simple READER program also included on the disk.

# **Who says that there's nothing new for OS-9 Level 2?**

## **Check these out!!**

**CoCoPRO! Solitaire for OS-9!** An all new game package! Written in 100% ML, this is the fastest solitaire game around! Includes regular and Klondike variations, options for large or small cards, and source code! Requires OS9 lv 2, joystick or mouse.

**Special only \$12.95!**

**QuickLetter OS-9!** No bells, few whistles...QuickLetter OS 9 is designed for quick and easy correspondence and small documents, without the hassles, steep learning curves, and the higher price of full-blown word processors! Req. OS9 lv 2, printer

**Intro special only \$19.95!**

### **Accounting Level 2!**

A comprehensive personal/small biz package! Supports up to 100 accounts w/menu of most common payees, account & ledger printouts, cashflow statements (w/graphs), tracking of tax/GST paid, recurring payments, & more! Req. basic acct. knowledge, OS9 lv 2, joystick or mouse.

**Special! only \$34.95!**

**Tools 3!** An all new set of 24 useful utils for OS-9! Includes filehandling utils (such as enhanced copy commands and filefinding), OS extensions (such as the ability to do "lightning"-fast backups in one pass, and password protection for any file), module generating utils (create modules without an assembler), point & click utils, and many more. As a special bonus, we include the OS9 Oscilloscope! Req. OS9 lv 2, some utils require 512k

**24 useful utilities for only \$29.95!**

Announcing **Pixel Blaster** - a high speed, versatile graphics and animation library for OS-9. Written in 100% efficient assembly-language, **Pixel Blaster** delivers lightning-fast action through incredible functions, designed for fast graphics manipulation. And, with the included BASIC09 interface and C library, you can now incorporate sophisticated animation techniques (even 3-D!) into your own programs easily, whether or not you program in ML!

Now, there's no need to view RSDOS assembly as the only option for creating high-speed action games. If you can program in BASIC09, C, or OS-9 assembly, you can use **Pixel Blaster** to get the action and speed you want, *under OS-9!* Requires OS-9 Level 2.

**only \$29.95!**
